23-24 September 2019 | SDPI, Islamabad

Introduction:
Logical approach is the key for improving the competencies and analytical skills of researchers, policy makers, journalists, business developers, etc. It further adds to the extended quality of knowledge and products. This workshop is designed for the people working in social sector so that they might be able to understand and investigate the discipline referred as 'scientific methodology'. At the end of this workshop, the participants would be able to have a clear understanding about the philosophy of science and how does it relate to methods in social sector scientific research. The participants would also be able to differentiate between quantitative and qualitative research traditions and designs. This course will prepare them to understand the data collection methods and basic orientation about Statistical Package for Social Science (SPSS).

Key Contents (tentative):
1. Philosophical base of research
2. Fundamentals of qualitative and quantitative research
3. Analyzing qualitative data
4. Methods in qualitative research
5. Grounded Theory
6. Developing interview guideline
7. Quantitative research methods
8. Mixed method research
9. Use of digital tools for Research methods
10. Introduction to SPSS

Who Should Attend?
This workshop is specifically designed for educationists, researchers working in development sector, M&E experts, policy planners, social scientists, business developers, investigative journalists and dynamic HR professionals.

Objectives:
Interactive group discussions will be held and participants will share their working experiences with each other. Activity based learning, self-assessment exercises to pinpoint the areas of strengths and improvements in developing learning objectives and processes will be the key objectives of this workshop.
